Reasons for Allowance

1. The Amendment filed 6/15/05 has been entered.
2. The following is an examiner's statement of reasons for allowance: The amendment filed 6/15/05 places the application into condition for allowance by incorporating into the rejected claims 1 and 9 the features that the function is specifically a navigation apparatus function (and thus 'navigation' applies to a vehicle navigation system and not merely a generic term for navigating an interface) which furthermore comprises a user registering navigation related data in a memory in which only a predetermined amount of data can be registered. The amendment also clarifies that a predetermined menu item is selected by a user. Note that claim 7 already was allowable. When a user attempts to register navigation related data in the memory, and the predetermined amount of data is already registered, the menu item corresponding to the navigation apparatus function is disabled and a message indicating that that it cannot be selected due to memory limitations is displayed in the field of that menu item for registering the navigation related data. The features combined are not set forth in the prior art of record.

Independent claims: 1 amended – the method as described above. 7 amended – the apparatus specifically mentioning that the navigational related data is route guiding. 9 amended – the method similar to claim 1 amended, with the function reading the navigation related data set by the user.

Art Unit: 2174

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
